

# PRODUCT DATA SHEET

Article No. 64.410.0 - Fuse TC Green Wns Low S1P ESD SRC

- Protection: steel cap and flexible FAP® midsole
- Plus: FUSE.TEC® technology, ESD, toe cap protection
- Upper: durable microfiber with breathable Sandwich Mesh
- Lining: BreathActive functional lining
- Footbed: evercushion® BA
- Sole: double density PU sole **naturalFLEXMOTION™** with iCELL-element, very flexible, extreme cushioning and slip resistant
- Sizes / Width: 36 - 42 / F

natural**FLEXMOTION™**

## natural**FLEXMOTION™**

The double density PU sole consists of an enormous soft and cushioning PU midsole and a very flexible PU outsole. The wafer profile provides extra support on industrial floors, is easy to clean and offers firstclass „LadderGrip“.

## FUSE.TEC®

Thanks to FUSE.TEC® we can avoid using thick and uncomfortable stitching in the flex-zones of the shoe. It's not just about more comfort, it also provides great durability.

## iCELL

The hard-wearing honeycomb structure of the iCell element improves the cushioning while enhancing the shoe's stability, guidance and comfort.

## SteelCap

New developed SteelCap with more space for the toes for more comfort and with a special fit for ladies' feet.

## evercushion® BA

This anatomically designed footbed provides a high level of comfort and moisture control, giving a pleasant foot climate. This footbed, as used in high performance sports shoes, is made from a soft, opencell, resilient foam that will not compress in wear, which assures a high level of cushioning, breathability and moisture regulation.

## Upper

No, it's not leather, but a hardwearing, easy-to-care microfiber material that is water- and dirt repellent. Furthermore the sandwich-mesh is particularly breathable. The coarse-meshed nylon fabric is extremely tear-resistant, offers a good padding and does not show any sign of fatigue in tough working conditions.
